WRITING ASSIGNMENT .....	28

## General information

OSIRIS Case is the digital platform for the entire procedure (application, interim assessment, and final assessment) of research projects, writing assignments, mini-projects and profiles within the GSLS. This guide provides information about the different steps that are relevant for the examiner who can access OSIRIS Case via [Osiris Lecturer/Supervisor \(Docent/Begeleider\)](#).

Students will start a new case for each of the following components: major research project, profile project (if applicable), business internship (only SBM students), mini-project and writing assignment.

Contact information (problems, questions, or suggestions):

- General OSIRIS Case matters
  - o BMS: [infobms@umcutrecht.nl](mailto:infobms@umcutrecht.nl)
  - o Bioscience: [science.gsls@uu.nl](mailto:science.gsls@uu.nl)
- SolisID enquiries:
  - o BMS: [solisbeheer@umcutrecht.nl](mailto:solisbeheer@umcutrecht.nl)
  - o Science Faculty: [servicedesk@uu.nl](mailto:servicedesk@uu.nl)

## 1. Access to OSIRIS Case – requirements for examiner

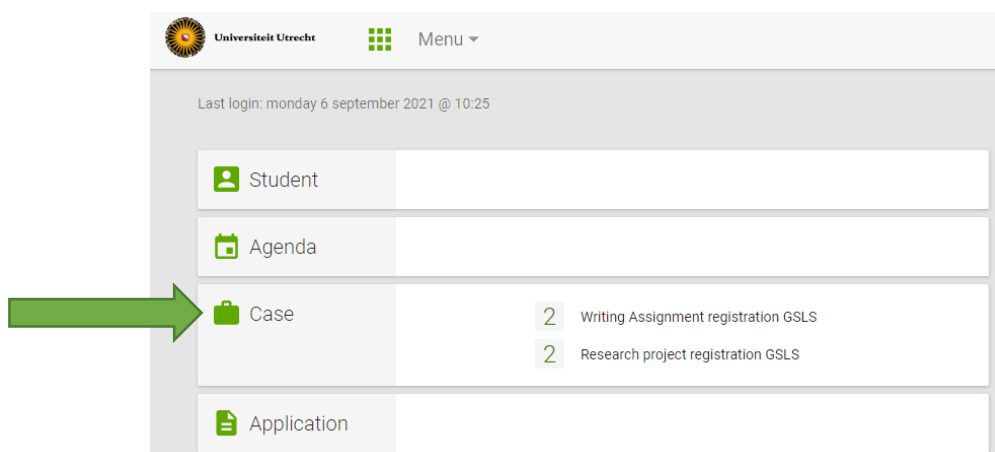

Everything you need to access OSIRIS Case is:

- **SolisID**. Staff and students belonging to Utrecht University automatically receive their SolisID that gives access to Utrecht University services. If you do not have a SolisID (UMC Utrecht staff) click on the link [here](#). Despite already having a SolisID, it could be that you still must be awarded certain rights to evaluate applications. In this case, UU-employees may contact [science.gsls@uu.nl](mailto:science.gsls@uu.nl) and UMCU examiners may contact [infobms@umcutrecht.nl](mailto:infobms@umcutrecht.nl), mentioning in the subject 'SolisID, Osiris Case'.
- **2FA** (two-factor authentication). The information in OSIRIS requires a high level of protection. You can find more information on how to set up the 2FA [here](#).

## 2. Approval of project application

After discussion between examiner and student and agreement on the basis of the project, the student can start the application by opening a new case. When the application is submitted in OSIRIS Case, you as examiner will receive an email from 'Universiteit Utrecht ([noreply@uu.nl](mailto:noreply@uu.nl))' with information and request to review the application (also directly available in [Osiris Lecturer/Supervisor](#)).

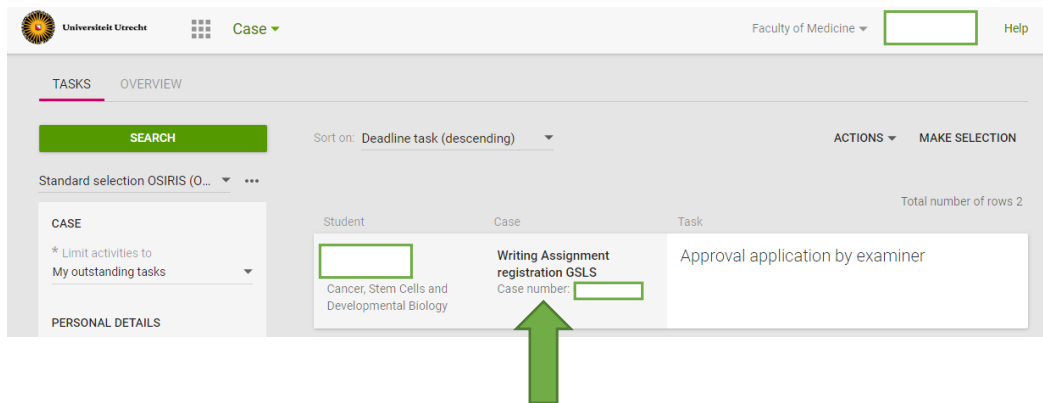

You will see the OSIRIS Case interface with your pending tasks under 'Case':

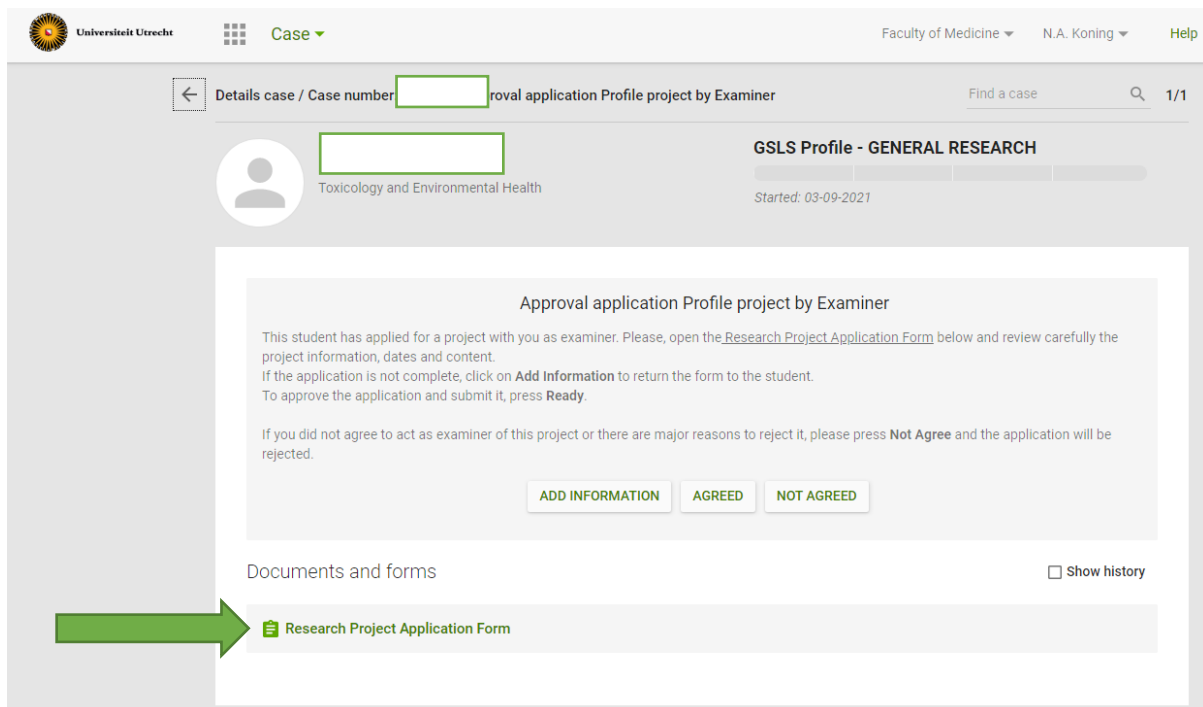

**Note (!)** Make sure to check the upper right corner for faculty rights. In certain cases, you might need to switch faculty to access cases of students from different Master's Programmes:

Select the case by clicking on the student's name or project:

The case will open, and you can then review the submitted application by opening the form:

After checking the application in detail, including dates and content, you should click on 'Agreed' to digitally sign the application. The application will then be automatically sent to the programme coordinator. If the application is not complete, you should select 'Add information' and a text box will pop up to provide with an explanation for the student.

**Please note (!)** you are allowed to make changes in the application form and save them, however these changes cannot be tracked, and the student will NOT be notified which changes are made by you. Thus, we advise you ask the student to make changes in the form instead.

After your approval, the application form will automatically reach the other parties involved for approval (e.g., programme coordinator). The Board of Examiners has four weeks to assess the request after receiving it. When the application is fully approved by the Board of Examiners you will receive an automated email from Osiris. You can track the progress of the application in the Overview tab of the case:

The screenshot displays the 'Overview' tab of a case in the Osiris system. The case title is 'Approval application Profile project by Examiner' and the profile is 'GSLs Profile - GENERAL RESEARCH'. The user is identified as 'Toxicology and Environmental Health'.

**Case Summary:**

Case number	Version	Status	Remark
[Redacted]	5	Started: 03-09-2021	Explanation case

### 3. Approval of Interim Assessment form

This step is only present during major research projects, business internships, and profile projects – it does not apply to writing assignment cases.

The interim assessment meeting is an essential step in the project and should take place 2-3 months after the start of the project. After the meeting, the student will upload the Interim Assessment form and you will be notified. If you open the case (1), you will see the uploaded form:

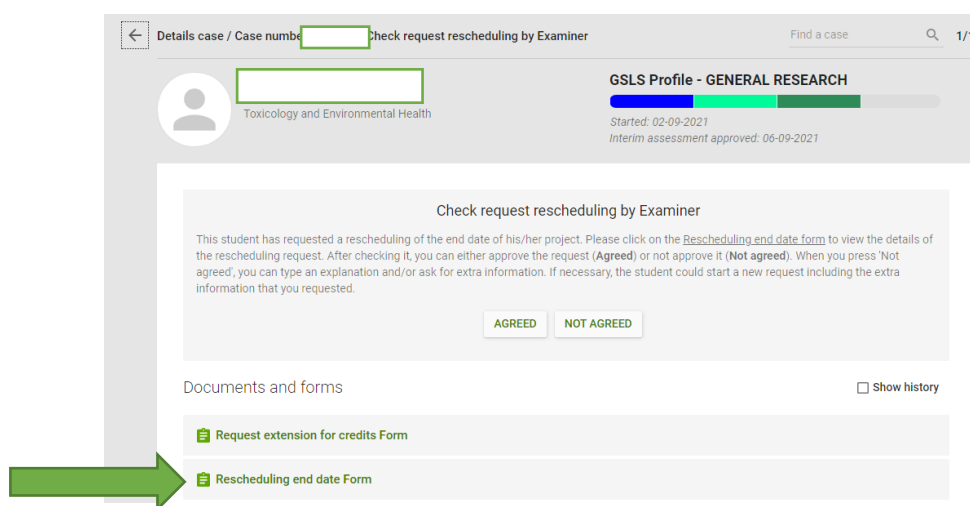

The screenshot shows a task management interface. At the top, there is a search bar with the text 'Find a task / Case number: [redacted] Approval interim assessment report'. Below this, there is a user profile section for 'GSLs Profile - GENERAL RESEARCH' with a progress bar and the text 'Started: 26-08-2021' and 'Profile Project application approved: 26-08-2021'. On the left, there is a sidebar with 'Task' selected, and sub-items: 'Overview', 'Data', 'Linked cases', and 'Activity log'. The main content area is titled 'Approval interim assessment report' and contains the following text: 'This student has handed in his/her interim assessment report. This report requires your approval. Only after your approval the student will be able to hand in his/her final report at the end of his/her project.' Below this, there is a paragraph: 'Please click on the student name to view the details of the interim assessment report. Here you can open the attached rubric or report. After checking it, you can either approve the application (Akkoord) or request additional information from the student (Aanvullen) via the appropriate buttons.' There are two buttons: 'READY' and 'ADD INFORMATION'. A green box with the number '2' and a green arrow points to the 'READY' button. Below this, there is a section titled 'Documents and forms' with a 'Show history' checkbox. It lists several documents: 'Final Assessment Form', 'Research Project Application Form', 'Interim assessment Form' (with a sub-item 'GSLs - Internship contract - 2020-2021.pdf'), and 'Profile Application Form'. A green box with the number '1' and a green arrow points to the 'Interim assessment Form' entry.

If the information is correct, you should press 'Ready' (2) for the project to move to the next step. If the Interim Assessment report is missing information, press 'Add information' to send the form back to the student for completion.

#### 4. (Optional) Approval of rescheduling end date

This step is only present during profile projects – it does not apply to other types of applications. The option for requesting an extension is only possible after the Interim Assessment step has been completed.

In certain occasions, the student might need additional time to complete the project. If that is the case, the student will have the option to request a new end date for the project by uploading a valid motivation. Please, check the information provided in detail and approve the motivation within the case. You can see the valid reasons for rescheduling the end date on the students' site. The Research Project Coordinator will check the motivation and approve/reject the request.

Some projects provide the option to extend the project with additional credits in those cases where the structure of the project changed, and additional components were added to the initial application. The student can also submit a request for extension with ECs in this step to the Board of Examiners for approval.

#### 5. Submission of final assessment

Before the end date, you will receive a reminder about the next steps to finalize the project. The tasks will appear in the case for you to submit the final assessment.

Please make sure that you have the following documents:

1. The plagiarism report ([Urkund](#))
2. A motivation for the grade that you are about to register (using the [Rubrics](#) (preferred) or alternatively a written motivation).

Details case / Case number: [redacted] Final assessment by examiner Find a case 1/1

**GSLs Profile - GENERAL RESEARCH**  
Started: 02-09-2021  
Interim assessment approved: 06-09-2021

### Final assessment by examiner

Once your student has finished his/her practical work, report and presentation, you can start the final assessment. Please click on the [Final Assessment Form](#) to continue. In the final assessment form, you need to enter the following information:

- Your grades for research skills, report and presentation;
- Grades from the second reviewer (internal research project) or supervisor host institute (external research project). The second reviewer/supervisor host institute will approve his/her grade in the next step;
- Motivation for the grades (e.g. rubrics);
- (Ephorus) plagiarism check (and if the percentage is higher than 10%, a motivation explaining this).

**!! Please fill out the assessment form first, before clicking on 'Ready' !!**

**2** → **READY**

Documents and forms  Show history

Final Report

**1** → **NEW DOCUMENT**

**Final Assessment Form \***

Fill in the Final Assessment Form and upload all the documents (1). Afterwards press 'Ready' (2) to submit it. The second reviewer (internal project or writing assignment) or the supervisor host institute (external project or writing assignment) will receive an automatic email to confirm the grades in Osiris Case. The student will then receive information to upload the final report in the system.

The case will be concluded once the Master's Administration Office registers the grades in the system.

## Appendix 1: Screenshots of application forms per case

Below, per application case, you can find the screenshots of the Osiris Case environment. This will be useful for you to know when the students and you are discussing a new application.

### Major Research Project/Business Internship

The screenshot shows a web application interface for a 'GSLS Research Project Application form'. The page has a yellow header bar with a close button (X) on the left and a 'SAVE TEMPORARILY' button on the right. The main content area is titled 'GSLS Research Project Application form' and features a progress indicator '1 Research Project' on the left. A blue note states: 'Please note: you can only complete this application procedure if your examiner has a solis-ID. If your examiner does not have a solis-ID yet, please follow the instructions in the link below and send the solis-ID of your supervisor to the Master administration or enter it in this form:'. Below this note is a button labeled 'APPLY FOR SOLIS-ID'. The form contains several dropdown menus: 'Master's programme\*' with the selected value 'Drug Innovation as of 2021'; 'Research project type\*' with the selected value 'Select'; 'Academic year\*' with the selected value 'Select'; 'Full-time/part-time (filled automatically)\*' with the selected value 'Select'; and 'Starting block\*' with the selected value 'Select'. At the bottom, there are two lines of text: 'MA-LS-1 is similar to selecting a Teaching Period as with course registration (default). MA-LS-2 is only used in exceptional cases and should not be used unless you are instructed to change this field by our Master's Administration.'

## Dates and duration of the project

Starting block\*

Select ▼

---

**MA-LS-1 is default.**  
MA-LS-2 should not be used unless you are instructed by the Master's Administration.

### Dates and duration of the project

Start date writing assignment\*

mm/dd/yyyy

Number of weeks spent on courses during writing assignment\*

Specify course titles and dates if applicable

Number of weeks spent on holiday or other activities during writing assignment\*

---

Specify dates if applicable

---

Number of total EC\*

Writing Assignment (7,5 ec) ▼

---

Make agreements on dates for handing in -as well as feedback on- the writing plan, the first draft, and the final version. Also include dates of additional meetings.

Time Schedule:\*

Add the number of weeks spent on courses and/or holiday to the duration of your project to calculate the end date of your project. This end date does not include the time your examiner takes to assess your project.

End date writing assignment (automatically calculated based on the information entered above)\*
